Subject index

Adenine derivatives
Association of methyl, amino and hydroxy derivatives of adenine at a mercury electrode at various sodium chloride concentrations (Jursa, Vetterl) 237
Alkaline iron electrodes
Role of sulphide additives on the performance of alkaline iron electrodes (Vijayamohanan et al.) 55
Aluminium
STM imaging of Al(111) and polycrystalline Al samples in air (Szklarczyk et al.) 279
Aprotic solvents
Solubility and electrochemical determination of CO_2 in some dipolar aprotic solvents (Gennaro et al.) 203

Bipyridinium oximes
Square-wave voltammetry of some bipyridinium oximes (Komorsky-Lovrić) 161
Bisulfate adsorption
A study of bisulfate adsorption on Pt(111) single crystal electrodes using in situ Fourier transform infrared spectroscopy (Faguy et al.) 245
Butyrolactone
Conductivity of ionic solutions of $LiAsF_6$ and $LiBF_4$ in equimolar mixtures of γ-butyrolactone with 2-methyltetrahydrofuran (Balkowska et al.) 171

Carbon dioxide
Solubility and electrochemical determination of CO_2 in some dipolar aprotic solvents (Gennaro et al.) 203
Charge transport
Ac-impedance studies of charge transport and redox capacities at poly-4-vinylpyridine films on electrode surfaces (Lindholm) 85
Chlorazepate
Interfacial and redox behaviour of prazepam and chlorazepate accumulation at the HMDE surface (Zapardiel et al.) 143
Cobalt
Current oscillations during electrodissolution of a cobalt electrode induced by the presence of nitrate ions in sulphuric acid solutions (Sazou et al.) 217
Compact layers
The growth of compact layers at the electrode interface. Part V. Films of Mo–Mg–methoxo-clusters active in nitrogen fixation (Gavrilov et al.) 117
Copper
In-plane structural and electronic characteristics of underpotentially deposited copper on gold (100) probed by in-situ X-ray absorption spectroscopy (Tourillon et al.) 263
Current oscillations
Current oscillations during electrodissolution of a cobalt electrode induced by the presence of nitrate ions in sulphuric acid solutions (Sazou et al.) 217

Dipolar aprotic solvents
Solubility and electrochemical determination of CO_2 in some dipolar aprotic solvents (Gennaro et al.) 203

Formic acid
Oxidation of formic acid at platinum microparticles dispersed in a polyaniline matrix. Influence of long-range order and metal–polymer interaction (Gholamian, Contractor) 69

Germanium
Instability of sputtered platinum films on germanium reflection elements in aqueous solutions (Zippel et al.) 297
Gold
In-plane structural and electronic characteristics of underpotentially deposited copper on

gold (100) probed by in-situ X-ray absorption spectroscopy (Tourillon et al.) 263
Polarization modulation IR spectroscopic study of electrochemically generated species from TCNE at a gold electrode in the Kretschmann ATR geometry (Wadayama et al.) 29

Heavy water
A theoretical analysis of the Hg/D_2O interface (Lamperski) 285

Illuminated semiconductor electrodes
The impedance of surface recombination at illuminated semiconductor electrodes. A non-equilibrium approach (Goossens, Schoonman) 11
In-plane structural and electronic characteristics
In-plane structural and electronic characteristics of underpotentially deposited copper on gold (100) probed by in-situ X-ray absorption spectroscopy (Tourillon et al.) 263
Interface
Approach to the molecular models of an interface based on the mean field approximation (Dutkiewicz, Lamperski) 1
Iron
Role of sulphide additives on the performance of alkaline iron electrodes (Vijayamohanan et al.) 55
Iron hexacyanoferrate
Solid-state electrochemistry of iron hexacyanoferrate (Prussian Blue type) powders. Evidence for redox transitions in mixed-valence ionically conducting microstructures (Kulesza) 103
Iron naphthalocyanine
Oxygen reduction in acid media on supported iron naphthalocyanine. Effect of isomer configuration and pyrolysis (Biloul et al.) 189
Isomer configuration
Oxygen reduction in acid media on supported iron naphthalocyanine. Effect of isomer configuration and pyrolysis (Biloul et al.) 189

Kretschmann ATR geometry
Polarization modulation IR spectroscopic study of electrochemically generated species from TCNE at a gold electrode in the Kretschmann ATR geometry (Wadayama et al.) 29

Lithium hexafluoroarsonate
Conductivity of ionic solutions of $LiAsF_6$ and $LiBF_4$ in equimolar mixtures of γ-butyrolactone with 2-methyltetrahydrofuran (Balkowska et al.) 171
Lithium tetrafluoroborate
Conductivity of ionic solutions of $LiAsF_6$ and $LiBF_4$ in equimolar mixtures of γ-butyrolactone with 2-methyltetrahydrofuran (Balkowska et al.) 171
Long-range order
Oxidation of formic acid at platinum microparticles dispersed in a polyaniline matrix. Influence of long-range order and metal-polymer interaction (Gholamian, Contractor) 69

Magnesium
The growth of compact layers at the electrode interface. Part V. Films of Mo–Mg–methoxo-clusters active in nitrogen fixation (Gavrilov et al.) 117
Mean field approximation
Approach to the molecular models of an interface based on the mean field approximation (Dutkiewicz, Lamperski) 1
Mercury
Assocation of methyl, amino and hydroxy derivatives of adenine at a mercury electrode at various sodium chloride concentrations (Jursa, Vetterl) 237
Interfacial and redox behaviour of prazepam and chlorazepate accumulation at the HMDE surface (Zapardiel et al.) 143
A theoretical analaysis of the Hg/D_2O interface (Lamperski) 285
Metal–polymer interaction
Oxidation of formic acid at platinum microparticles dispersed in a polyaniline matrix. Influence of long-range order and metal–polymer interaction (Gholamian, Contractor) 69
Methoxo compounds
The growth of compact layers at the electrode interface. Part V. Films of Mo–Mg–methoxo-clusters active in nitrogen fixation (Gavrilov et al.) 117
Methyltetrahydrofuran
Conductivity of ionic solutions of $LiAsF_6$ and $LiBF_4$ in equimolar mixtures of γ-butyrolactone with 2-methyltetrahydrofuran (Balkowska et al.) 171
Microstructures
Solid-state electrochemistry of iron hexacy-

anoferrate (Prussian Blue type) powders. Evidence for redox transitions in mixed-valence ionically conducting microstructures (Kulesza) 103

Mixed-valence ionically conducting microstructures

Solid-state electrochemistry of iron hexacyanoferrate (Prussian Blue type) powders. Evidence for redox transitions in mixed-valence ionically conducting microstructures (Kulesza) 103

Molecular models

Approach to the molecular models of an interface based on the mean field approximation (Dutkiewicz, Lamperski) 1

Molybdenum

The growth of compact layers at the electrode interface. Part V. Films of Mo–Mg–methoxo-clusters active in nitrogen fixation (Gavrilov et al.) 117

Nitrate ions

Current oscillations during electrodissolution of a cobalt electrode induced by the presence of nitrate ions in sulphuric acid solutions (Sazou et al.) 217

Nitrogen

The growth of compact layers at the electrode interface. Part V. Films of Mo–Mg–methoxo-clusters active in nitrogen fixation (Gavrilov et al.) 117

Non-equilibrium approach

The impedance of surface recombination at illuminated semiconductor electrodes. A non-equilibrium approach (Goossens, Schoonman) 11

Oxygen

Oxygen reduction in acid media on supported iron naphthalocyanine. Effect of isomer configuration and pyrolysis (Biloul et al.) 189

Platinum

In situ FTIR studies on the adsorption and oxidation of n-propanol and isopropanol at a platinum electrode in sulphuric acid solutions (Sun et al.) 177

Instability of sputtered platinum films on germanium reflection elements in aqueous solutions (Zippel et al.) 297

Oxidation of formic acid at platinum microparticles dispersed in a polyaniline matrix. Influence of long-range order and metal–polymer interaction (Gholamian, Contractor) 69

A study of bisulfate adsorption on Pt(111) single crystal electrodes using in situ Fourier transform infrared spectroscopy (Faguy et al.) 245

Polyaniline

Oxidation of formic acid at platinum microparticles dispersed in a polyaniline matrix. Influence of long-range order and metal–polymer interaction (Gholamian, Contractor) 69

Poly(3-methoxydiphenylamine)

Synthesis, characterization and properties of poly(3-methyldiphenylamine) and poly(3-methoxydiphenylamine) (Nguyen, Dao) 37

Poly(3-methyldiphenylamine)

Synthesis, characterization and properties of poly(3-methyldiphenylamine) and poly(3-methoxydiphenylamine) (Nguyen, Dao) 37

Poly-4-vinylpyridine

Ac-impedance studies of charge transport and redox capacities at poly-4-vinylpyridine films on electrode surfaces (Lindholm) 85

Prazepam

Interfacial and redox behaviour of prazepam and chlorazepate accumulation at the HMDE surface (Zapardiel et al.) 143

Propanol

In situ FTIR studies on the adsorption and oxidation of n-propanol and isopropanol at a platinum electrode is sulphuric acid solutions (Sun et al.) 177

Prussian Blue

Solid-state electrochemistry of iron hexacyanoferrate (Prussian Blue type) powders. Evidence for redox transitions in mixed-valence ionically conducting microstructures (Kulesza) 103

Pyrolysis

Oxygen reduction in acid media on supported iron naphthalocyanine. Effect of isomer configuration and pyrolysis (Biloul et al.) 189

Quartz crystal microbalance

Electrochemical and quartz crystal microbalance evidence for mediation and direct electrochemical reactions of small molecules at tetrathiafulvalene-tetracyanoquinodimethane (TTF-TCNQ) electrodes (Freund et al.) 127

Redox capacities

Ac-impedance studies of charge transport and

redox capacities at poly-4-vinylpyridine films on electrode surfaces (Lindholm) 85

Scanning tunnelling microscopy
STM imaging of Al(111) and polycrystalline Al samples in air (Szklarczyk et al.) 279

Semiconductors
The impedance of surface recombination at illuminated semiconductor electrodes. A non-equilibrium approach (Goossens, Schoonman) 11

Silver
Electrochemical behaviour of polycrystalline silver in solutions containing tetraphenyl borate anion (Bharathi et al.) 291

Small molecules
Electrochemical and quartz crystal microbalance evidence for mediation and direct electrochemical reactions of small molecules at tetrathiafulvalene-tetracyanoquinodimethane (TTF-TCNQ) electrodes (Freund et al.) 127

Sodium chloride
Association of methyl, amino and hydroxy derivatives of adenine at a mercury electrode at various sodium chloride concentrations (Jursa, Vetterl) 237

Solid-state electrochemistry
Solid-state electrochemistry of iron hexacyanoferrate (Prussian Blue type) powders. Evidence for redox transitions in mixed-valence ionically conducting microstructures (Kulesza) 103

Square-wave voltammetry
Square-wave voltammetry of some bipyridinium oximes (Komorsky-Lovrić) 161

Sulphide additives
Role of sulphide additives on the performance of alkaline iron electrodes (Vijayamohanan et al.) 55

Sulphuric acid
Current oscillations during electrodissolution of a cobalt electrode induced by the presence of nitrate ions in sulphuric acid solutions (Sazou et al.) 217
In situ FTIR studies on the adsorption and oxidation of n-propanol and isopropanol at a platinum electrode in sulphuric acid solutions (Sun et al.) 177

Surface recombination
The impedance of surface recombination at illuminated semiconductor electrodes. A non-equilibrium approach (Goossens, Schoonman) 11

Tetracyanoethylene
Polyrization modulation IR spectroscopic study of electrochemically generated species from TCNE at a gold electrode in the Kretschmann ATR geometry (Wadayama et al.) 29

Tetraphenyl borate anion
Electrochemical behaviour of polycrystalline silver in solutions containing tetraphenyl borate anion (Bharathi et al.) 291

Tetrathiafulvalene-tetracyanoquinodimethane
Electrochemical and quartz crystal microbalance evidence for mediation and direct electrochemical reactions of small molecules at tetrathiafulvalene-tetracyanoquinodimethane (TTF-TCNQ) electrodes (Freund et al.) 127
